Kristy, Amber, and Siobahn monitor the Huachuca Water Umbel at Bingham Cienega (Priscilla Titus)

WHAT DOES AZNPS DO?

AZNPS works with the Southwest Rare Plant Task Force to develop strategies for protecting rare species and their habitats.

AZNPS keeps abreast of conservation issues concerning native species and responds to those through our Conservation Committee.

AZNPS promotes the use of native species in residential and commercial landscapes.

AZNPS publishes The Plant Press, supports the publication of scholarly work, and maintains a website with information and links about native plants.

AZNPS hosts a series of local and statewide events that provide forums to learn from professionals.

Arizona Native Plant Society is a statewide nonprofit organization whose mission is to promote knowledge, appreciation, conservation, and restoration of Arizona native plants and their habitats.

Mountain Wallflower, *Erysimum wheeleri* (Gene Balzer)

MEMBER ACTIVITIES AND BENEFITS

- Chapter and state-wide gatherings
- Field trips and educational presentations
- Conservation through education, outreach, and restoration
- Habitat restoration projects
- Informative website, newsletters, and journal
- Interaction with plant experts and enthusiasts

Smoke Tree flower, *Psoralea argophylla* (Phil Jenkins)

AZNPS NEEDS YOU!

There were over 100 species of rare, native plants in Arizona as of the last survey. Due to continuing loss of habitat we expect to discover even more that need protection.

Invasive species compromise native plant habitats, can promote fire and cause loss of species diversity.

In addition to joining AZNPS, you can help preserve native plants for future generations by:

- working with home owners, nursery owners, and landscape professionals to incorporate native plants in their projects
- contributing to native plant research
- eradicating nonnative invasive species
- collecting native seeds to use in restoration of native plant habitats
